

Babies and Young Living

why seedlings?

A study was done that measured the number of chemicals found in the blood of newborn baby umbilical cords. The Environmental Working Group (EWG) found 200+ chemicals in the cord blood, including ones that are harmful to the development of your precious baby. This tells us that we as mothers need to be very cautious about the products we are using in utero, but it is also a great reminder that our babies are exposed to chemicals from the second they are conceived. As parents, we can make every effort to select safe and effective products to use on them once they are born to minimize the amount of chemical exposure.

You can read more about the study [HERE](#).

Young Living knows exactly how sensitive your babies are and believes it is important to use 100% safe and effective ingredients. YL developed the Seedlings line to provide naturally-derived and plant-based solutions for the littlest, most vulnerable members of our families.

And even better, ALL of the products we are about to explore were dermatologist-tested, hypoallergenic, vegan-friendly, and formulated without lanolin, parabens, phthalates, petrochemicals, synthetic preservatives, synthetic fragrances, or synthetic colorants.

Seedlings products are safe to use even with your newborn infant! What a blessing to have peace of mind using these wonderful products with your precious little one!

seed to seal promise

As parents, we all want the very best for our kids. That means we want high-quality products that are safe and effective.

Young Living is the ONLY company that provides something called Seed to Seal. Seed to Seal is a quality commitment unlike anything else; they have control of the ENTIRE process, from the seed to the sealed bottle. Check out some of the strict guidelines they abide by to fulfill their promise in sending only the best products to your home.

- Plant material that is grown on corporately-owned farms or carefully vetted partner farms (that you CAN visit!)
- Sustainable farming and sourcing practices, providing the purest oil
- Great care is taken to preserve and protect natural resources
- Hand-weeded fields and ZERO use of pesticides
- Oils that retain all their natural constituents and therapeutic properties
- Use of food-grade distillers with state-of-the-art design and distillation methods
- Low pressure and low-temperature distillation, without the use of solvents or synthetic chemicals
- Rigorous testing on each batch by internal labs and third-party facilities
- Oils that are carefully reviewed through every step of production in order to meet or exceed industry safety and purity standards (above and beyond organic!)

And the best part... if the oils do not meet these high standards they are rejected and will not be bottled as a Young Living product. YL would rather have something go out of stock than let an inferior product slip through to us. It's rare to find a company with such high standards. Now that's amazing!! To learn even more, go [HERE](#)!

why quality matters

Why does it matter that Young Living seedlings products are made **without** lanolin, parabens, phthalates, petrochemicals, synthetic preservatives, synthetic fragrances, or synthetic colorants? Here are some facts for you!

LANOLIN is a product derived from sheep that can contain GMOs and pesticides when those sheep are exposed to them. GMOs are often doused with glyphosate, which can be an endocrine disruptor.

PARABENS are known carcinogens (linked to skin cancer). They are also reproductive and developmental toxins.

PHthalates (listed as DEP, DBP, & DEHP on labels) are toxic to the reproductive system and affect fetal development. Phthalates also disrupt your endocrine system and are known carcinogens.

PETROCHEMICALS (including mineral oils) are made from petroleum and may cause breakouts, premature aging, and may negatively affect your hormones and immune system.

(Petrochemicals are found in many commonly available lotions, creams, ointments, and cosmetics.)

Did you know that 95 percent of the chemicals in **synthetic fragrances** are derived from petrochemicals? These petrochemicals include benzene derivatives, aldehydes, and phthalates. These and many other known toxins are capable of causing cancer, birth defects, nervous-system disorders, and allergies. Some of these petrochemicals are even cited on the EPA's hazardous waste list [HERE](#).

Many **artificial (synthetic) dyes** have been banned from use in food because of the health problems they cause. Unfortunately, there are relatively few restrictions on the types of dyes that can be used in our skincare products. The most common synthetic colors used in cosmetics and hair dyes are called FD&C colors. They are derived from coal tar, which is a by-product of petroleum. Because some coal tar dyes have been known to cause cancer, they are regulated by the FDA in foods, but not in skin care products, as to the amount of lead or arsenic they are allowed to contain (more info [HERE](#)).

The Seedlings line contains **NONE** of these harmful ingredients!

the calm blend

All of the Young Living Seedlings products are lightly scented with a unique blend of their high quality essential oils that make up the “Calm Blend.”

Lavender can be topically applied to soothe minor skin irritations and can be diffused to promote feelings of calm and help fight nervous tension.

Coriander has a sweet, warm fragrance that is calming and gently uplifting.

Ylang Ylang has calming and relaxing properties. It nourishes the skin and hair, moisturizes skin, and enhances the appearance of healthy-looking skin.

Geranium has a sweet, floral scent. It's great for those with sensitive skin and can help maintain healthy-looking skin. It has a balancing, peaceful, and calming aroma.

Bergamot is purifying and cleansing for the skin while having a calming effect. It's often used as a luxurious ingredient in shampoos, soaps, and cleansers.

seedlings baby wipes

The **Seedlings Baby Wipes** are made with a soft, thick material that can handle a variety of messes and can be used on any part of your infant's skin, leaving a soothing, light scent from our Calm essential oil blend.

BONUS USES

These wipes make great makeup removers and dryer sheets without all the nasty chemicals found in typical store products. If you don't know about dryer sheets and all the yucky things they contain, do a little search on the Think Dirty App!! You will be shocked by what is in conventional dryer sheets!

These wipes are safe to use on your pets too! They are also really effective to use as a “freshen up, anytime or anywhere” wipe. Forgot to put on deodorant? No problem. Wipe those pits clean. #NoShame

Note: These can be purchased as single packs or multiple packs.

seedlings baby wash & shampoo

Bath time is a time to bond with your babies. The last thing you want to do during this precious time is to get soap in their eyes and make them cry, ruining this special time. #MomFail

To make sure they are tear-free, don't use cheap shampoos full of chemicals.

The **Seedlings Body Wash and Shampoo** is tear-free and free of harmful chemicals, so you don't have to worry about getting some in their eyes or harming their precious bodies.

It gently cleanses both their hair and skin and leaves them feeling baby soft and supple. Who doesn't love a two-for-one? It has a light scent that is calming and soothing making it perfect for bath time.

seedlings linen spray

The **Seedlings Linen Spray** is naturally-derived and alcohol-free, which makes it completely safe to use with your baby! It helps to add a calming aroma to linens and creates a soothing, relaxing atmosphere. It's also an awesome refresher for crib sheets, blankets, car seats, clothing, carpet, and other fabrics. Spray this just before you lay your little one down to help carry your little one into a peaceful and restful night's sleep.

This bottle is small enough to keep in your diaper bag for those days when we could all use a little more “calm” during our busy routines. #MomHack

seedlings baby lotion

The **Seedlings Baby Lotion** is a gentle moisturizer specially formulated for delicate infant skin. It has a non-greasy formula that supports the natural moisture barrier and smoothly absorbs into your baby's sensitive skin without being slippery. It's also one of my favorites for aging skin!

It's made with plant-based, naturally derived ingredients and is lightly scented. It's also hypoallergenic and dermatologist-tested. Adding lotion into your post-bath bedtime routine is an effective way to massage your little one into relaxation.

seedlings diaper rash cream

Sensitive skin calls for gentle products. The **Seedlings Diaper Rash Cream** has mild, gentle ingredients you can feel good about; and they work.

This thick, lavender-scented cream reduces the duration and severity of diaper rash when applied at the first sign of redness. It soothes on contact, protects your baby's delicate skin, and acts as a physical barrier to wetness!

It is made with non-nano zinc oxide approved for the treatment and prevention of diaper rash. It's also dermatologist-tested and hypoallergenic!

Tips to Avoid Diaper Rash

- Change infant's diaper often
- Use gentle wipes (like YL Seedlings Wipes)
- Don't scrub your infant's bottom; gently rub away any stool and pat dry
- Allow infant time without a diaper; natural air and light is good for their skin
- Use chlorine-free diapers or try cloth diapers

seedlings baby oil

This mild, gentle product contains Young Living's high-quality essential oils diluted to an appropriate strength for your baby. It creates a calming aroma while being non-greasy and it easily absorbs into your baby's oh-so-soft skin. It helps to soothe, hydrate, and nourish baby's delicate skin. It's dermatologist-tested, hypoallergenic, and vegan-friendly.

The **Seedlings Baby Oil** is for topical use only. It's not made for your diffusers.

Many parents find giving their infants daily massages before bedtime or naptime to be an extremely enjoyable and beneficial experience. [CLICK HERE](#) for an article explaining some baby massage techniques you can use.

the seedlings gift bundle

How many times have you been invited to a baby shower and have NO idea what to take? You want to stand out from the crowd, so you opt out of purchasing items from the registry but you still want to give something really useful.

This bundle makes the perfect baby shower gift! It comes with one of each of the Seedlings products in a cute little basket. It also comes with a hooded bath towel and washcloth made of 100% unbleached cotton. They are super soft - the perfect way to clean, dry, or cuddle a new baby.

Get the Best Deal

Who wants to pay full price when you can get the same thing at a discount?

Young Living has several options to help you get started and snag the best deal possible. Even if you already have your own Young Living account, there are still some money-saving tricks you need to know!

Shoot me a message and I can walk you through the options.

a few side notes
